<u>Source</u>	<u>Reference</u>	<u>Summary</u>	<u>Reliability</u>	<u>Usefulness</u>
Statista website	Alsop, T. (2022). <i>How many people have access to a computer 2018</i> Statista. [online] Statista. Available at: https://www.statista.com/statistics/748551/worldwidehouseholds-with-computer/.	This website shows how over the years technology is being used by more and more people each year.	As this is an official website that specialise in delivering statistics this makes it a reliable source as it holds statistics about various other information other than technology and cybersecurity	This source is useful as it allows me to see how technology has developed into what it is today and how more and more people use it. This helps me realise this is why cybersecurity is so crucial because of the amount of users accessing it.
Vinciworks Website	Group, V. (2022). <i>What are Confidentiality, Integrity and Availability in Information Security?</i> [online] VinciWorks. Available at: https://vinciworks.com/blog/what-are-confidentialityintegrity-and-availability-ininformationsecurity/#:~:text=The%20th	The website talks about the availability and integrity in information		This source is useful as it taught me even more knowledge about data and how it's used for a variety of different uses.

doi:https://doi.org/10.1007/978-1-4614-7597-2_1.

This website shows the advancement of technology and how it has developed and improved.

This source is reliable and trusted to use because it is a .org website which means it comes from an official organisation.

This is useful for me to see exactly how technology has advanced and take this into considering when looking into the cybersecurity in todays world.
